

CHAMFER HOWEL

The experienced Cooper will appreciate this tool. It takes the place of the heavy chamfer knife, and on account of its easy running and small bit to grind, makes it an all-round good tool. Can be used on any size barrels. Finished in polished nickle with high-grade tempered bit. Complete\$3.50

NO. 1. CROZE

This Croze has been found to be far superior to the old style Croze on account of its rounded ends which allow it to glide over the barrel freely and the simple but positive clamp which holds the bit. Can be used on half-barrels, flour barrels and 19-inch barrels. Finished in polished nickle with high-grade tempered $\frac{1}{2}$ -in. V bit. Weight, 4 lbs. Complete\$3.00

Mr. Chas. H. Groth, Rochester, Pa.

Dear Sir and Brother: The set of tools I ordered from you arrived O. K. They are creating quite a bit of excitement around the shop, as all the fellows are anxious to try them out, and so far all express themselves very much pleased. No doubt you will receive many orders for your tools, as they are a big improvement for the cooper trade.

Yours very truly,
JOHN JOY,
LESTER A. GAYSELO.

Washington, Pa., Feb. 1, 1922.

ED CAYMOOD,
WM. CAYMOOD.

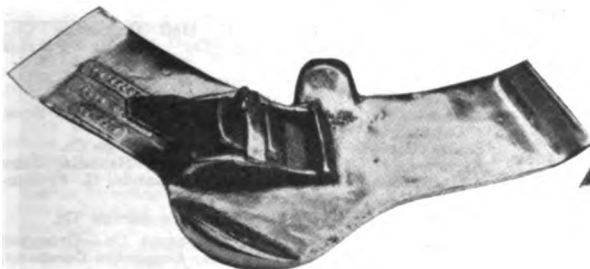

Evansville, Ind., Jan. 28, 1922.

Mr. Chas. H. Groth, Rochester, Pa.

Dear Sir and Brother: Your tools received and found them all you represented them to be. I worked your No. 2 croze in a 34-inch head cask and as small as a 19-inch head today. The chamfer howel is a big improvement on any I have ever used. I will have some of the boys that take in the apple barrel rush come out and see these tools and explain to them the advantages of them over the other makes. Wishing you success, yours truly,

1021 N. Bromley, Evansville, Ind.

HENRY JONES.

SAFETY BARREL LEVELER

This Safety Barrel Leveler is constructed with guide to run in the barrel, protecting operator from injury. Can be used on any size barrel. High grade tempered steel bit. Finished in polished nickle. Complete.....\$2.50

NO. 2. CROZE

This Croze is the same in every detail as No. 1 Croze, with the exception that it is used on 19-inch barrels, tierces and casks. Weight, 4 lbs. Complete\$3.00

The tools I am offering have all been tried out by some of the best Coopers in the trade, who are using them today with great satisfaction. In some sections of the country my tools are unknown. If you feel that for your own benefit you need a good set of tools around you on your bench to make ten barrels a day more, you can have on approval one or more of these tools. If you decide to keep them, simply send in money order as per list price. Thanking you in advance for this courtesy, cordially yours,

CHARLES H. GROTH
